

Instruction for using the medical services at Clalit without presenting the insurance card

If you need to use the Clalit medical services and you do not have your magnetic insurance card yet, please visit one of the Clalit clinics and ask the receptionist to update your cellphone number in their system. (This is the opportunity to ask the receptionist for a user name and a password to the Clalit website. This way in the future, you will be able to get the test results through the Clalit website)

After updating your cellphone number you can use the medical services by calling *2704. Then you will be asked to put your Clalit membership number in the system. That will open your medical file at the Clalit and you will be able to use the medical services without the need to present your magnetic card for the next 3 hours.

Sincerely,

Harel-Yedidim Staff
