

PCR TESTS and Green Pass Instructions

PCR TESTS – Instructions for those insured under the Clalit provider

Please visit one of the Clalit clinics in your area and ask the receptionist to update your phone number in the Clalit computers. Then ask her for a user name and a password to the Clalit website. That will enable you in the future to get test results through the Clalit website

If you need to have a Corona test, you can have it in one of the two options:

1. Visiting one of the Pikud Haoref centers (government centers where tests are free). You will need to provide your Israeli cellphone number and your passport. If you will be asked if you have KUPAT CHOLIM (HMO) you need to say NO. You should get the results to your cellphone within 24-48 hours
2. Through Clalit – In order to schedule a test, you need to book an appointment through *2700 (Dial 4 for English and then *8 for Corona, then press 3 for Corona test). You will be provided with location and time for the test. The result should get to your cellphone, or you will be able to get it through the Clalit website within 24-48 hours.

How to get your Green Pass for those who were vaccinated abroad

If you were vaccinated abroad and you want to apply for the green pass in Israel, you need to have a serology test. It can be done in one of the hospitals in Israel. The price for the serology test is 200-300 shekels nonrefundable. It takes 2-3 days to get the results. After you will get the serology test results, please call the ministry of health at *5400. Give the representative the passport number which is written on the document that you got from the laboratory. This way the representative will be able to find your name in Ministry of Health systems. Then ask him/her for the green pass. If the representative will ask you if you are a member of KUPAT CHOLIM (HMO) you should say NO.

The representative will also ask you for some more personal details as your Israeli cellphone number, email address etc. The green pass should get to your email 3-4 days later.

Good Luck

The Harel-Yedidim Team
